

## **P2000 *Plus* PRINT DEVELOPER** *Neutral Tone*

**P2000 *Plus* PRINT DEVELOPER** is a fast acting developer, producing neutral tones continuously from highlights to shadows while maintaining a smooth continuous curve of normal contrast. **P2000 *Plus* PRINT DEVELOPER** is a clean working, phenidone based print developer producing pure blacks, clean whites, and detailed middle tones

**P2000 *Plus* PRINT DEVELOPER** is recommended with a starting dilution of 1 part concentrate to 7 parts water. Contrast may be varied by mixing **P2000 *Plus* PRINT DEVELOPER** at different dilutions and compensating with development time and temperature.

**P2000 *Plus* PRINT DEVELOPER** is suitable for automatic machine processing, replenished with working solution at 0.15 ml/sq.in. paper.

**P2000 *Plus* PRINT DEVELOPER** is non-staining and does not contain metol, an irritant.
